Subject: Anaconda Yerington EPA Response to BHHRA Tech Memo Approach

Dear Jack,

Thanks for the opportunity to review your proposed approach for the OU1 and OU3 Baseline Human Health Risk Assessments. Please find attached a table of our responses. I am copying the EPA consulting team and our colleague Jeryl Gardner at NDEP. We'd be happy to discuss or clarify any of our comments. Our previous efforts to schedule a call resulted in too many conflicts. If you can survey your primary team and get back to me with a number of dates and times in July to choose from I will work again with me team to find a match.

Best Regards,

David A. Seter, P.E.
